SHREE BHAWANI PAPER MILLS LIMITED

DIRECTORS' REPORT

We have the pleasure of presenting the 31st Annual Report together with the audited accounts of the Company for the year ending 31st March, 2010.

Transfer from General Reserve	838	-
Loss carried to Balance Sheet	-814	-1188

Salient features in operations of the year under review :

1. Market condition was adverse and prices of News Print fell by more than 40%, with a glut in News Print market. Those manufacturers who could switch from news print manufacturing to writing printing did so, which resulted in increased supply of writing printing paper also. This depressed the price and demand of writing printing paper for most of the year.
2. The Company was compelled to take forced shut due to increase in finished goods inventory. This led to short fall in production by nearly 9,000 tons and in turn over by Rs. 27 crores.
3. There was a strike in Kanpur ICD resulting in piling up of containers due to poor infrastructure during April – July 2009. Your Company had to pay huge demurrage and detention charges on its imports due to above factor.
4. Imported waste paper price increased by nearly 30 to 40% and availability has gone down due to reduced paper consumption in developed countries. Shipping charges to India have also increased abnormally due to lack of availability of containers for India. This factor has led to increase in imported raw material cost substantially. Import is a compulsion because domestic waste paper has to be supported by imported raw material to maintain the quality.

There is a good demand of agro waste paper manufactured by the Company and recently, the international market for writing/printing paper also improved along with increase in demand of news print during the current year. On the whole, paper prices and market appear to be much better for the current year.

SHREE BHAWANI PAPER MILLS LIMITED

CAPITAL EXPENDITURE SCHEME

A Capital Expenditure Scheme of Rs. 20 crores is under implementation. Under this, a Chemical Recovery Plant to recover Soda Ash from effluent and increase in agro pulping is planned. Along with this, the two old paper machines will be up graded for better quality paper manufacturing at lower cost. The Scheme is being financed by Term loan from Banks, internal accrual and preferential allotment of Equity Shares to Promoters and associates.

CAPITAL

The Company proposes to issue Preferential Equity Capital totalling Rs.5 crores to Promoters and Associates to finance the Capital Expenditure under implementation.

CLEAN DEVELOPMENT MECHANISM (CDM) PROJECT

During the year under review, the Company received 23780 units of CERs for our contribution to reduce carbon emissions from first & second Rice Husk Based Cogeneration Power Project for activity from 1st September, 2008 to 31st August, 2009. We realized a sum of Rs.197 lacs net of expenses from sale of these CERs.

We expect to receive further 29045 CERs for activities undertaken during financial year 2009-10 from both Cogeneration Power Projects. However, revenue generated from sale of these CERs will be accounted on actual receipt.

The renewal/repayment of two deposits amounting to Rs.0.67 lacs could not be made for want of instruction thereof from the depositors up to 31st March, 2010 which has since been renewed till the date of this report.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDUSTRY STRUCTURE & DEVELOPMENT

Indian paper industry is poised to grow and touch 11.5 million tonnes from 9.18 million tonnes to 2011-12 from 2009-10 at the rate of 8% per annum. Demand for upstream market of paper products like tissue paper, tea bags, filter paper, light weight online coated paper, medical grade coated paper etc. is growing up. Though per capita paper consumption in India is one of the lowest in the world but is increasing steadily. With stress on education and spending of education cess, the demand of writing, printing paper is also bound to go up.

There are, at present, about 700 units, mostly small and medium enterprises (SMEs), engaged in the manufacture of paper and paperboards and newsprint in India. The Indian paper industry is estimated to be worth Rs. 25,000 crore (USD 5.95 billion), which gives employment to around 1.3 million people directly and around 4 million people indirectly.

Paper industry is highly diverse, technical and capital intensive. Norms relating to environmental pollution and tighter effluent treatment/discharge parameters etc. have restricted rapid expansion of paper industry.

The Recent finance budget has placed a lot of emphasis on inclusive growth with development of infrastructure, education and health services as its main pillars. However, rising costs and inflation is a matter of concern and we hope that with normal monsoon predicted for this year and other actions being taken up by the Government, inflation should come down.

The recycled based paper industry has been increasing its share of contribution globally year after year on account of various inherent virtues and helps it in providing to maintain ecological balance. In a fibre deficit country like India, the paper mills are depending heavily on utilization of recycled fibres to meet ever increasing raw material requirements of paper industry. The recovery ratio of waste paper in India is only 30 percent which is very low. Because of no proper mechanism of utilization of waste paper. India is importing waste paper to the tune of 5 million tones approx per annum as raw material. The price of waste paper has been going up steadily in the international market also, due to shortage of recycled fibre and high pulp prices.

OPPORTUNITIES AND THREATS

The recent introduction of the Rights to Education Act is expected to give a tremendous boost to demand for paper. The on going national census and UID initiative are also expected to result in substantial demand for paper. Changes in life style and growth in IT sector will continue to drive increasing demand for tissue paper. Export markets will also present attractive opportunities at least in the near future. Therefore, we expect paper prices to gradually improve to more reasonable levels. However, further new capacities of nearly 400000 tons of writing & printing papers are expected to come on stream some time in 2010-11 which may keep prices under check.

The Company imports about 50% of the raw material which is prone to foreign exchange fluctuation. However, the Company is constantly trying to source cheaper furnish without compromising on quality of the finished product. Further, with the implementation of Capital Expenditure Scheme, reliance on imports will come down by nearly 50%.

Due to demand and supply gap in our Country, the Company is assured of a stable market for its products. The Company is focused in reducing cost of Production and maintaining the competitiveness through quality improvement, better energy management and increased usage of agri residues.

The Company is actively pursuing export of its premium products like coloured printing and poster paper. During the current year, exports of these products are expected to grow manifold as these products have a niche market.

The main strength of the Company lies in its ability to sustain in the leaner period by switching of production capacity from newsprint to writing printing segment and vice versa. Through Innovation and continuous up gradation in efficiency & improvement in the health of the plant, the Company has been able to increase its production capacity substantially over the years.

SHREE BHAWANI PAPER MILLS LIMITED

PRODUCTWISE PERFORMANCE

During the year 2009-10, the Company manufactured 45548 tons of printing, writing & newsprint paper which is higher by 10% of previous year. Production could have been still higher but for adverse market conditions.

OUTLOOK

The market condition since April 2010 has improved. The paper manufactured on old machine from agro pulp has good demand especially coloured printing and coloured poster. We are actively exploring the export market of MG papers. The international market for writing printing paper has also improved and there is higher demand and price realization for news print.

The Company proposes to implement the Capital Expenditure Scheme of Chemical Recovery Plant and up gradation of MF paper machine along with increased use of own pulp. This will reduce the cost of production and increase sales realisation and result in higher operating profits. Paper demand is expected to improve in the current year resulting in better price realisation.

RISK AND CONCERNS

- The Indian Paper Industry faces shortage of quality raw material and constant increase in cost of raw materials, chemicals and other inputs.
- The availability of paddy husk fuel for Power Plant is mainly seasonal and dependant upon the monsoon for good crop.
- Increased competition in paper industry may adversely affect the business of the company.
- The Company faces competition from cheap imports from Russia, Indonesia and South East European Countries.
- Weakening of the Rupee will increase cost of waste paper and production cost.

FINANCIAL PERFORMANCE

During the year 2009-10, the Company manufactured 45548 tons of paper and registered a net sale of Rs.126 crores. This was higher by 10% in terms of production and Rs.8.9 crores in net sales. Production could have been still higher but for adverse market conditions. Salient features in operations of the year under review:

1. Market condition was adverse and prices of News Print fell by more than 40%, with a glut in News Print market. Those manufacturers who could switch from news print manufacturing to writing printing did so, which resulted in increased supply of writing printing paper also. This depressed the price and demand of writing printing paper for most of the year.
2. The Company was compelled to take forced shut due to increase in finished goods inventory. This lead to short fall in production by nearly 9,000 tons and in turn over by Rs. 27 crores.
3. There was a strike in Kanpur ICD resulting in piling up of containers due to poor infrastructure during April – July 2009. The Company had to pay huge demurrage and detention charges on its imports due to above factor.
4. Imported waste paper price increased by nearly 30 to 40% and availability has gone down due to reduced paper consumption in developed countries. Shipping charges to India have also increased abnormally due to lack of availability of containers for India. This factor has lead to increase in imported raw material cost substantially. Import is a compulsion because domestic waste paper has to be supported by imported raw material to maintain the quality.

There is a good demand of agro waste paper manufactured by the Company and recently, the international market for writing/printing paper also improved along with increase in demand of news print during the current year. On the whole, paper prices and market appear to be much better for the current year.

SHREE BHAWANI PAPER MILLS LIMITED

During the year under review, the Company received 23780 units of CERs for our contribution to reduce carbon emissions from first & second Rice Husk Based Cogeneration Power Project for activity from 1st September, 2008 to 31st August, 2009. We realized a sum of Rs.197 lacs net of expenses from sale of these CERs.

We expect to receive further 29045 CERs for activities undertaken during financial year 2009-10 from both Cogeneration Power Projects. However, revenue generated from sale of these CERs will be accounted on actual receipt.

INTERNAL CONTROL SYSTEM AND THEIR ADEQUACY

The Company has an adequate system of Internal Control implemented by the management to ensure proper safeguarding of the assets and protection against loss from unauthorized use or disposition. The Internal Control System is devised to ensure that the financial and other records are reliable for preparing financial statements and other data and for maintaining the accountability of assets.

In addition, the Internal Audit work is conducted by independent professional firm of Chartered Accountants. The Internal Auditors have consistently expressed their satisfaction about adequacy of internal control systems and procedures followed by the Company for conducting its business efficiency. All issues raised by Internal Auditors are being suitably dealt with and rectified under the close monitoring of the Audit Committee.

C. Recognition of Income and Expenditure :

The expense is recognised at the present value of the amount payable determined using actuarial valuation techniques. Actuarial gains and losses in respect of post employment and other long term benefits are charged to the profit and loss accounts.
iii) The company has created an approved gratuity fund and has taken a Group Gratuity Insurance Policy with Life Insurance Corporation of India for future payment of gratuity to employees. The Company accounts for gratuity liability equivalent to the premium amount payable to Life Insurance Corporation of India every year.

H. Fixed Assets :

Fixed assets are stated at cost net of modvat/cenvat less accumulated depreciation and impairment loss, if any. Pre-operative expenses including eligible borrowing cost incurred during construction period and issue expenses related to funds raised for financing the project are charged to capital work-in-progress and on completion, the costs are allocated to the respective fixed assets.

I. Borrowing Cost :

Borrowing costs that are attributable to the acquisition and construction of qualifying assets are capitalised as a part of the cost of such assets till the assets are ready for its use. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are charged to revenue.

J. Provision and Contingencies :

The Company creates a provision when there is present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made.

ii) Foreign currency monetary items are reported using the closing rate. Exchange differences arising on the settlement of monetary items or on reporting the same at the closing rate as at the balance sheet date are recognised as income or expenses in the period in which they arise except in case of liabilities incurred for the purpose of acquiring the fixed assets from outside India in which case such exchange differences are adjusted in the carrying amount of fixed assets.

Finished goods and work-in-progress include costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Chemicals and Stores and Spare Parts are valued at or below cost. Cost of inventories is generally computed on weighted average/FIFO basis.
