MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Overall Economic Overview

Paper industry in India continues to face twin challenges of sharp escalation in cost of all major inputs and simultaneous pressure on realisations. Demand for Writing & Printing Papers is estimated to have remained stagnant during the year with the added problem of increasing imports of paper. However, there is a renewed optimism about revival of growth momentum based upon huge expectations from the new Government at the centre. While it is too soon to expect results on the ground, we do believe that the Government is moving in the right direction with determination.

Today, it would be difficult to live without paper, paperboard, and other paper-based products. Levels of paper consumption are also a reflection of relative wealth, as there is a clear correlation between gross domestic product and per capita paper consumption. In many developing countries, per capita paper consumption amounts to only a few kilogram. The largest consumers are the USA, Canada, many Western European countries, and Japan, with well in excess of 200 kg per person, compared with the global average of 60 kg per person. Paper and paperboard production has been expanding rapidly world-wide for over half a century and is expected to reach at a record level of 490 million tons by the end of 2020. Paper is now one of the most globalized commodities in the world, with high volumes of production exported and high volumes imported. Global paper consumption is at a record high level and it will continue to grow.

The global paper industry has been facing a dual impact with economic slowdown and decrease in paper consumption in developed markets due to electronic media and digitisation. As a result, the global paper industry has witnessed very low single digit growth in past few years with major growth impetus coming from emerging economies such as India and China. Asian markets are becoming large consumption centers on account of their high consumption base with low penetration.

India is set to become the world's fastest-growing major economy by 2016 ahead of China, the International Monetary Fund (IMF) said in its recent latest forecast. India is expected to grow at 6.3 per cent in 2015, and 6.5 per cent in 2016 by when it is likely to cross China's projected growth rate, the IMF said in the latest update of its World Economic Outlook. India's macro-economic prospects have strengthened and the Country is best positioned among emerging market economies, gaining global investor's attention, says a Report by ICICI Bank. The government, engineering an economic rebound with a slew of reforms, has unveiled a new statistical method to calculate the national income with a broader framework that turned up a pleasant surprise. There is a renewed confidence in the Indian market brought about by a series of economic reforms pursued by the government coupled with the fall in crude oil prices, interest rates and inflation.

Opportunities and Threats

The Indian paper and paperboards industry has potential and also capabilities to service the growing demand in domestic and international market and also to create huge employment avenues in the rural-India through agro/production forestry. The low per capita consumption of paper/ paper board in the Country bound to increase with the growth in GDP, rising income of middle class, increasing demand of computer stationery and spending by Government on education sector.

The following competitive weaknesses and threats confront the Industry:

- i) Inadequate availability of virgin fibre resulting in high cost of raw materials.
- ii) Small and fragmented industry structure.
- iii) Many non-competitive mills.
- iv) Inconsistent multi-tiered quality of products.
- v) Environmental problems of most of the small pulp mills.
- vi) High energy consumption and costs.
- vii) Likely closures, owing to increasingly stringent environmental regulations.
- viii) Paper manufacturers had to cope with several pressures including the depreciating rupee, high inflation, rising input prices, short supply of grid power, low liquidity, high interest rates, low demand growth and global recessionary trends.

Outlook

The paper industry is understood to be cyclical in nature and its performance depends on the global pulp and paper demand supply situation which is not encouraging at present. The industry is witnessing slowdown in demand from December, 2013.

The Company has filed a Reference application under Section 15 (1) of Sick Industrial Companies (Special Provisions) Act, 1985 (SICA) with Hon'ble BIFR which was registered as Case No. 29/2013. In the hearing held on 26th September 2013, the Hon'ble BIFR declared the Company as 'Sick' u/s 3 (1) (o) of SICA and appointed Bank of Baroda as the Operating Agency (OA) u/s 17 (3) of the Act to prepare a Rehabilitation Scheme for the Company. The Company has submitted the Draft Rehabilitation Scheme (DRS) to Bank of Baroda (OA) and other stakeholders with a copy to Hon'ble BIFR. The last date of hearing was to be held on 24th April, 2014, was postponed sine die.

Indian Bank has sold its loan to the ARC M/s JM Financial Asset Reconstruction Company Pvt. Ltd. who have filed miscellaneous application with Hon'ble BIFR substitution of its name in place of Indian Bank.

The revival of the Company is dependent on approval of DRS at the earliest.

Risk and Concerns

- Paper Industry is capital intensive and yields poor returns on investments.
- The revival of the Company is dependent on approval of Draft Rehabilitation Scheme at the earliest.
- The paper industry is one of the 18 highly polluting categories of industries and the executives of the industry, Central and State Government Agencies, Pollution Control Boards and others have prepared a Charter on Corporate Responsibility for Environmental Protection (CREP). The Charter enlists time-bound action points to be implemented by the paper industry for progressive up-gradation of technologies and in-plant practices for reduction in effluents and emissions as well as improvement in waste management systems.
- The Company has commissioned the Chemical Recovery Plant which will increase its capacity to manufacture own pulp and reduce dependence of imported raw-material. New Chemical Recovery Plant could earn additional income for the company by sell of the by-product - soda ash.
- Undue fluctuation in the exchange rate between Indian Rupee and US Dollar will impact the margins of the Company.
- The Central Pollution Control Board (CPCB) vide its Letter No.D-23012/1/PCI-III/5944-5948 has stopped the production on all the three paper machines of the Company. Due to which, the financial position was further deteriorated because of Nil production in last five months of this Financial year. Conditional clearance of the same was received in March, 2015. The Company is exploring various avenues to infuse the funds for revival of the Company.
- The Company has installed state-of-art manufacturing facilities at the plant (nearly 75% of the total net block is brand new) including the De-inking plant, co-generation plant, CRP and the newly installed paper mill.

Productwise Performance and Reasons for Losses

During the year under review, the Company has manufactured 7499 tons of printing, writing and newsprint paper with net sale of Rs.28.28 crores. In October, 2014, the Central Pollution Control Board (CPCB) vide its Letter No.D-23012/1/PCI-III/5944-5948 has stopped the production on all the three paper machines of the Company. Due to which, the financial position was further deteriorated because of Nil production in last five months of this Financial year. Conditional clearance of the same was received in March, 2015. The Company is exploring various avenues to infuse the funds for revival of the Company.

Regarding market scenario, we would like to inform, that, due to unrestricted duty free import of Newsprint, the price of Newsprint has gone down by nearly 10% during the year. The new plant set up is mainly for Newsprint and favorable market condition is a necessity to restart the plant. The Company is making all effort to comply with Pollution Control norms, which now required continuous online monitoring and investment.

Internal Control System and their Adequacy

The Company has an adequate system of Internal Control implemented by the management to ensure proper safeguarding of the assets and protection against loss from unauthorized use or disposition. The Internal Control System is devised to ensure that the financial and other records are reliable for preparing financial statements and other data and for maintaining the accountability of assets.

In addition, the Internal Audit work is conducted by independent professional firm of Chartered Accountants. The Internal Auditors have consistently expressed their satisfaction about adequacy of internal control systems and procedures followed by the Company for conducting its business efficiency. All issues raised by Internal Auditors are being suitably dealt with and rectified under the close monitoring of the Audit Committee.
